

We are a Venezuelan aquaculture group dedicated to the production of Vannamei (Panaeus Vannamei) Shrimp. Grupo Lamar is a vertically integrated company, comprised of its own Hatchery, Feed Mill, Farms, and Processing Facilities. This infrastructure combined with our direct to customer logistics enables us to distribute end product to consumers worldwide.

Cooked shrimp

OUR GOAL

Provide a product that exceeds quality standards that guarantees its position in the global markets.

OUR COMMITMENT

Our commitment is to breed, feed, process, and market shrimp abroad with the highest quality required by our customers.

VENEZUELA

PROUD OF OUR ORIGIN

30
years

GROUP

VANNAMEI SHRIMP

Our Shrimp

We are dedicated to the breeding, processing and export of Vannamei shrimp.

We guarantee complete traceability of our product, counting on the experience, knowledge of the market and ability to adapt to its demands; keeping us at the forefront of advanced technologies that optimize our processes.

Certifications

Lamar Seafood's dedication to sustainable harvesting and management practices is unsurpassed.

This is exemplified by our operations program by attaining:

- BAP 4-star (Best Aquaculture Practices)
- ASC Certification by the Aquaculture Stewardship Council

As a Sedex member we are committed to being a responsible business, sourcing responsibly and improving ethical standards and working conditions within the supply chain.

Shrimp feed

Operating since 2004, our feed mill Capacity has expanded to 100,000 tons per year with upcoming additional expansions. Grupo Lamar's premium Vannamei shrimp feed was formulated to cater to growing demands while allowing us to have greater control in our supply chain.

Our nutritional experts assure premium quality through constant studies and feedback integration for the evolution of our shrimp feed.

Hatcheries

Our laboratories cultivate the shrimp larvae used in our fields. With an annual breeding capacity of 10 billion larvae per year, our research and development teams implement genetic improvement plans through individual selection aiming for the best growth, resistance, and reproduction levels. Continuous monitoring of the entire production chain guarantees the sustainability and quality of our larval and shrimp output.
